## ***LED Block Assembly Machine***

### **Machine description**

- Index table with 20 holding chucks
- LED and housing feeding system through a bowl feeder out from bulk material
- Linear feeding with level control
- Comb advance system for component transport of LED
- Orientation of the poles adjustable
- Fully automatic assembly LED into plastic housing
- Various electrical and vision systems
- Adjustable lead wire trimming station
- Sorting system for accepted components and rejects
- Electronic programmable control system with LCD display

### **General machine equipment**

- Machine frame made out of aluminium profile; Cover: colour blue
- Protection Plexiglas covering around the working area
- Machine dimensions L x W x H in mm: approx. 1600 x 1000 x 1900
- Machine weight: approx. 400 kg

### **Production speed rate**

- Approx. 4.200 parts/ h

### **Options**

- Hopper feeder
- Barcode scanner
- Label printer
